Since the inauguration of STAY in 2006, the program has served 637 TAY (Transitional Aged Youth) participants, ranging in age from 16 through 25 years old. The following graphs and data, unless otherwise noted, presents information about the 375 participants (N=375) served during Fiscal Year July 2010 – June 2011. This represents a 14% increase in participants served during fiscal year 2009/10.

**Gender**—Of the 375 participants served during Fiscal Year 2010-2011, 57% were male and 43% were female.

**Age**—STAY is designed to serve participants between the ages of 16 through 25, although more than half of those served (58%) were between the ages of 20 and 23. For those aging out of the program, STAY provides resources to help them transition and link with either an adult program or a lower level of care.
**Ethnicity**—Throughout Fiscal Year 2010-2011, the highest self identified ethnicities are Caucasian (43%) and Hispanic (37%). Additionally, 11% Africans Americans and 1% Asians were served. The rest of the participants identify themselves as American Indian, Mixed or Other.

**Housing & Homelessness**—In the year prior to STAY enrollment, 159 participants had been homeless, in temporary emergency housing, or living in a shelter. Since STAY enrollment, 59 participants were found to be at least one day in a homeless or temporary housing category at any given time during Fiscal Year 2010-2011. That is a 63% decrease in homelessness since enrollment in STAY.
**Psychiatric Hospitalizations**—Reducing the number of participants’ psychiatric hospital stays is a goal of STAY Process. In the year prior to enrollment, 120 participants reported being admitted to a psychiatric hospital. Since STAY enrollment, 57 participants were in a psychiatric hospitalization setting, representing a 52% decrease.

N=375
**Incarcerations**—In the year prior to enrolling in STAY, 75 participants were incarcerated. Since enrollment, 44 participants were incarcerated, 16 out of those 44 participants were re-incarcerated, and 28 participants were incarcerated for the first time. STAY has had a 41% decrease in incarcerations in Fiscal Year 2010-2011.

**Education**—At the time of Enrollment in STAY Process, 74 (19%) participants were enrolled in a school setting. Since STAY enrollment, 96 (26%) participants have been enrolled in high school, adult educational/vocational school and a community or four-year college.

![Graph G](image)
Employment—At the time of enrollment in STAY Process, only 58 (15%) participants were employed. Throughout Fiscal Year 2010-2011, that number more than tripled to 160 (42%) participants employed at some point while enrolled in STAY. One reason for this increase is STAY’s supported employment program. This program offers subsidized work opportunities in community organizations and businesses, and prepares TAY’s for competitive employment.
June 2011 Employment & Education  As a representation of STAY Process participants’ employment and school attendance, a “snapshot” of June 2011 was examined. During that month, 84 out of the 209 participants enrolled in the program were employed, enrolled in school or doing both.
June 2011 Employment - STAY Process served 209 participants at the end of June 2011. Of that number, 55 participants were engaged in Employment. Of the 55 employed, 48 were in “Competitive Employment” and seven were in “Supported Employment”. STAY continues to work with new programs to offer increased employment opportunities for TAYs.

**June 2011 Education**—This is a “snapshot” of the education data from the 209 members enrolled at the end of June 2011. STAY focuses on the goals and the level of education of the participant. Graph K-1 shows 44 participants currently enrolled in an educational setting during that period. Graph K-2 shows those participants not enrolled in an educational setting during that month and indicates those participants who have a goal to attend school. Graph K-3 shows the highest level of education of those participants who plan to attend school.

**Education Setting in June 2011**

- **Not Enrolled**: 78%
- **Enrolled**: 21%
- **N/A**: 1%

**Goals to Attend School**

- **YES**: 68%
- **NO**: 32%

**Highest Level of Education**

- **Less than H.S.**: 33
- **H.S. Diploma**: 56
- **Some College**: 23
