COMMENTS			
<p>20090817: I am a member on the County of Orange: MHSA: TAC having reviewed the OC Plan in comparison to LA Counties': MHSA Three-Year Program and Expenditure Plan: Capital Facilities and Technological Needs Component Proposal: Draft for Review: July 2008. I find that what is contained in "our" (OC's) proposal appears rather good. As I come up with ideas, comments, and food for thought with regard to "our" plan: I will present them in a targeted and progressive manner to the OC MHSA TAC. I am most interested in the following areas with regard to MHSA related technology:</p> <ol style="list-style-type: none"> <li>1. The E.H.R. and how it will integrate with the PHRs.</li> <li>2. Quantitative longitudinal measures and integrating them into the E.H.R.s and PHRs.</li> <li>3. Features of the PHR and/or Network of Care that permit quantitative self administration of appropriate survey instruments (Subjective). That they may then be taken and addressed more objectively in a clinical setting possibly with reference to the same objective survey results.</li> <li>4. How this upgraded technology will amongst other things:            Save lives, cut costs, collect information relevant to substantiating "Best (better, good) Practices", help in determining program/plan viability and efficaciousness, better satisfy those it serves, provide for the mission and values of the MHSA, and constitute fuel for processes on larger enterprise levels (such as USD H&amp;HS, NiMH, and NIH).</li> </ol> <p>Thank you for your time and consideration: Keith</p>

**Subject:** Response to Public Comment on Technological Needs Project Proposal

Keith,

I received your comments on our project proposal and wanted to take this opportunity to thank you for your input. I look forward to our continued work together on the MHSa Technology Advisory Committee and hearing your ideas on integrating quantitative longitudinal measures into the design of our Electronic Health Record and Personal Health Record. Thanks again for your participation in the committee and sharing your assessment of our project proposal.
