PROGRAM DESCRIPTION

Care of the critically ill patient during emergencies or following traumatic injury holds special challenges for those who deliver healthcare. This half-day seminar is designed to educate healthcare and prehospital professionals in the current trends of state-of-the-art emergency care management. Topics will include Pediatric Emergencies, Mandated Reporting for Abuse Cases, Head Injuries and Hypovolemic Shock and Aeromedical Medicine.

TARGET AUDIENCE

Healthcare professionals specializing in emergent care of the critically ill patients: Nurses, Paramedics, and Emergency Medical Technicians.

PROGRAM OBJECTIVES

To increase the participant's knowledge of comprehensive care of the critically ill patient from initial stabilization to rehabilitation and prevention:

1. Identify and discuss the spectrum of diagnosis and management for pediatric patients presenting with specific signs and symptoms.
2. Explain the requirements for mandated reporting by the healthcare professional.
3. Describe the appropriate management and treatment of the head injured patient.
4. Discuss the implications of aeromedical transport for critically injured patients.
