INTEGRATED CORE PRACTICE MODEL:

A BLUEPRINT FOR THE CHILD AND FAMILY TEAM

CYBH INTENSIVE/SPECIALIZED PROGRAMS

Huma Athar-Macdonald, Psy.D.
Alice Kim, LMFT
Health Care Agency
Children and Youth Behavioral Health
Revised 6-8-21

INTRODUCTION

Background:

- 2011 settlement of a class action lawsuit (Katie A. vs. Douglas, previously Bonta) that mandates the provision of intensive inhome and community-based services for children who are in foster care or at imminent risk of removal from their families.
- Requires that the California Department of Social Services (CDSS) and the California Department of Health Care Services (CDHCS) provide comprehensive and integrated services to child welfare children to reduce overdependence on institutional and congregate care services, provide better access to mental health services and improve outcomes for this special needs population of children and youth.

INTRODUCTION (CONT.)

Who is Katie A.?

- > The plaintiff, Katie A., was a 14 year old Caucasian girl in 2002.
- She was removed from her home at age four and had been in foster care for 10 years.
- At age five, assessments of Katie A. indicated that she was a victim of trauma and needed intensive trauma treatment and supportive services for her caregiver.

INTRODUCTION (CONT.)

- She was moved through <u>37</u> different placements, including four group homes, <u>19</u> different stays at psychiatric hospitals, a <u>two-year</u> stay at Metropolitan State Hospital, and <u>seven</u> different stays at MacLaren Children's Center.
- Despite the recommendations from her previous assessments, she never received trauma treatment or other individualized outpatient mental health services.
- The Katie A subclass is now referred to as the Pathways to Well-Being (PWB) subclass.

THE INTEGRATED CORE PRACTICE MODEL (ICPM)

Definition : "ICPM is an articulation of the shared values, core components, and standards of practice expected from those serving children, youth, and families. It sets out specific expectations for practice behaviors for staff in direct service as well as those who serve in supervisory and leadership roles in child welfare, juvenile probation, and behavioral health as they work together in integrated teams to assure effective service delivery for children, youth, and families. Additionally, the ICPM promotes a set of values, principles, and practices that is meant to be shared by all who seek to support children, youth, and families including tribal partners, education, other health and human services agencies, or community partners."

I. The California Integrated Core Practice Model for Children, Youth, and Families (2018)

THE INTEGRATED CORE PRACTICE MODEL (CONT.)

- It is not a program, it is a "model" that helps guide service providers on how to deliver services to children/youth and their families in a way that is comprehensive, coordinated, and integrated.
- The ICPM is an important <u>shift</u> in the way we view the needs of the child/youth and their families and how to help them achieve their goals towards wellbeing.
- It helps us move away from a "deficit-based" view of understanding the child or youth to a "strength-based" view.

VALUES AND PRINCIPLES²

- → Children are first and foremost protected from abuse and neglect, and maintained safely in their own home.
- Services incorporate a blend of formal and informal resources designed to assist families with successful transitions that ensure long-term success
- Services are needs driven, strengtlbased, and family focused from the first conversation with or about the family.
- Services are culturally competent and respectful of the culture of children and their families.
- Services are individualized and tailored to the strengths and needs of each child and family.
- Services and supports are provided in the child and family's community.
- ❖ Services are delivered through a multiagency collaborative approach that is grounded in a strong community base.
- Children have permanency and stability in their living arrangements.

- Parent/Family voice, choice, and preference are assured throughout the process.
 - 2. UC Davis Extension Pathways to Mental Health Services: Core Practice Model Guide

TEAMING

Elements of Successful Teaming:

- Collaboration towards a common goal
- Team membership should include the child/family, social worker, and the mental health worker, as well as other invested parties
- Who joins the team is guided by the family's input
- When and where to meet are based on the needs and preferences of the family
- Meeting process is standardized
- Everyone contributes to the plan

THE CHILD AND FAMILY TEAM (CFT)

The CFT is central to the Integrated Core Practice Model:

"The CFT is a team of people – it is comprised of the youth and family and all of the ancillary individuals who are working with them toward their mental health goals and their successful transition out of the child welfare system."

Important to differentiate between CFT and CFT Meeting:

- √ The <u>CFT</u> is a group of people working together to achieve the child and family's vision for well being.
- ✓ The <u>CFT Meeting</u> is the vehicle by which team members communicate, plan, and coordinate the support services needed to realize the family's vision.

CHILD AND FAMILY TEAM (CONT)

"We already do that."

Yes, historically child welfare and mental health have worked together using various models of collaboration. Team Decision Making (TDMs), WRAP Team, Family Team meetings are some of the common formats for such collaborative efforts. However, the CFT goes beyond just having a meeting or working within a structure. It emphasizes a **teaming** process that values:

- Respecting each member's unique contribution to the group
- Clear definition of roles
- A common goal or vision for the child and family
- Accountability
- Child and family voice
- Collaboration at all levels of the Child Welfare and Mental Health systems

Coordinating Multi-Disciplinary Work	Working in a Child and Family Team Environment
Each service provider develops his/her own goals and outcomes with the child and family, ideally making sure that they do not conflict with other service goals	Goals and outcomes are developed and shared by all team members
Each service provider develops his/her own service plan	A single, comprehensive service plan incorporates and drives individual service provider plans
Decision making is done by the service provider with the child and family and communicated to others working with the child and family	Decision making is done by the team
Each service provider informs the other of major changes	Major changes are discussed and agreed to by all team members
Communication is often in summary form	Communication is constant and on-going
Team meetings are generally used for members to inform or report on their work or for a specific limited purpose, such as a placement decision	Meetings are used to plan together, make joint decisions and monitor and evaluate all of the various team member's work
Each service provider is responsible only for the activities related to his or her own discipline	Not only are all team members working toward a common goal, but all team members have the additional responsibility of the group effort
Success is measured independently	Success is measured by how successful the team is in progressing toward their shared goals and outcomes

Child and Family Team (CFT)

THE PATHWAYS TO WELL-BEING (FORMERLY KATIE A.) MENTAL HEALTH REFERRAL

Step I: After determining medical necessity, the therapist/provider completes the *Pathways to Well-Being* (PWB)/Intensive Services (IS) Eligibility Assessment form.

* If eligible for PWB/IS, the therapist must update the CARE PLAN to authorize ICC and/or IHBS services.

Step 2: If there is an open child welfare case, **regardless of of eligibility**, [secure] email (do not fax) a copy of the <u>PWB/IS</u> <u>Eligibility Assessment</u> form to the CFT Inbox at SSA:

CFSPathway2WellBeing@ssa.ocgov.com

Step 3: If the youth is Pathways to Well-Being eligible, call the social worker (SSW) to introduce self, provide availability, and coordinate the PWB CFT participants (contact 714-704-8875 (Index) or 714-704-8000 (Main) if the social worker is unknown).

Step 4: SSA social worker and the CFT Scheduler will work together to arrange the initial Pathways to Well-Being (PWB) CFT meeting.

Step 5: The therapist/provider will assume the role of Intensive Care Coordinator (ICC)* for the PWB CFT.

Step 6: The therapist/provider, as the ICC Coordinator, will participate in all PWB CFT meetings with the child/family and the SSA social worker.

Step 7: The therapist/provider as the ICC Coordinator, will complete the "CFT Plan" at <u>all</u> PWB CFT meetings.

*NOTE: If there is a primary therapist already assigned, then the therapist would become the Intensive Care Coordinator. However, if a therapist is assigned at a later date, it is important to have communication on who will then take on the role as the ICC Coordinator.

Please Note:

- The PWB/IS Eligibility Assessment form must be completed for **ALL** clients after medical necessity is established.
- If eligible for PWB/IS, the therapist <u>must</u> update the CARE PLAN to authorize ICC and/or IHBS services.
- For <u>out-of-county</u> PWB youth, the therapist contacts the assigned out-of-county social worker to coordinate services. The PWB/IS Eligibility Assessment form <u>does not need to be [secure]</u> emailed to Orange County SSA.
- If Wraparound is involved, the Wraparound Care Coordinator, will complete the "CFT Plan."

F063-25-806 (R11/17)

Copy: Service Folder - MH/Dev. Acco

- The child/youth and family, social worker and mental health provider must all be present in order for the meeting to be counted as a "CFT Meeting."
- The **CFT Facilitator**(a SSA representative): this person is responsible for laying out the structure and clarifying the ground rules for the meeting. The facilitator helps the team navigate through the process of establishing goals and objectives for the family. The facilitator ensures that the voice of the child/youth and family is central to the CFT meeting and that their vision for well being is made clear.

> The ICC Coordinator (a mental health representative): is responsible for working within the CFT to ensure that plans from any of the system partners are integrated to comprehensively address the identified goals and objectives and that the activities of all parties involved with services to the child/youth and/or family are coordinated to support and ensure successful and enduring change. The coordinator will typically be a mental health professional.

- The CFT meeting will be standardized to include:
 - ✓ A clearly defined purpose, goal and agenda for each meeting
 - An agreed upon decision-making process
 - ✓ Identification of family strengths and needs
 - Specific action steps to be carried out by team members according to a timeline
 - ✓ A review of the CFT Plan

- Everyone must be involved. All members of the CFT must contribute to the decision-making process and the development of goals/objectives. Each member is also responsible for, following through and reporting back on the tasks they have been assigned by the team.
- > The mental health therapist/provider must contribute by offering his/her expertise in addressing the behavioral, emotional and psychological needs of the child/youth and family.

- Reviewing and changing the CFT Plan is an ongoing process and should be done at each Child and Family Team meeting.
 Reviewing the plan should be done no less frequent than every 90 days.
- > The child/youth and family must always participate in this review.
- Document any activities related to the review and adjustments to the CFT Plan.

- Team members may communicate with one another and with the whole team in various ways:
 - Phone calls, conference calls, and/or emails (following confidentiality, HIPPA, PHI and Public Information standards).
 - Therapist/Provider will communicate regularly with CFT members and make sure team members have the information needed to make informed decisions.
 - Therapist/Provider and social worker will maintain regular/ongoing communication, sharing of information, and face to face discussions.

"Alone we can do so little, together we can do so much." --Helen Keller
