Local Data Set

*Also includes Outbreak non-health facilities: Assisted Living, Residential Care, Acute Psych

Facility Outbreaks (as of 6/6/20 1700)				
Facility Type	#	An "Outbreak" is two (2) or more confirmed cases of COVID-19 in facility residents occurring within 14 days.		
		Advanced Rehab Center of Tustin, Alamitos West Health & Rehab, Anaheim Healthcare Center, Buena Vista Care Center, Country Villa Plaza, Coventry Court, French Park Care Center, Garden Grove Convalescent		
Skilled Nursing 28		Hospital, Garden Park Care Center, Gordon Lane Care Center, Healthcare Center of Orange County,		
	Huntington Valley Healthcare Center, Kindred Brea SAU, Laguna Hills Health & Rehab, Manor Care FV,			
	20	Leisure Court Nursing Center, Orange Healthcare & Wellness, Orangegrove Rehab Hospital, Pacific Haven		
		Healthcare Center, Palm Terrace, Park Anaheim Healthcare Center, Sea Cliff Healthcare Center, Seal Beach		
		Health & Rehab, South Coast Post Acute, St. Edna Subacute & Rehab, The Hills Post Acute, West Anaheim		
		Extended Care, Windsor Gardens Center of Anaheim		
Assisted Living 6	6	Acacia Villa, ActivCare Yorba Linda, Brookdale Anaheim, Harbor Villa Care Center, Sunflower Garden, The		
		Groves of Tustin		
Care Home	2	Cambridge House, Kamstra		

CDPH SNF Dataset

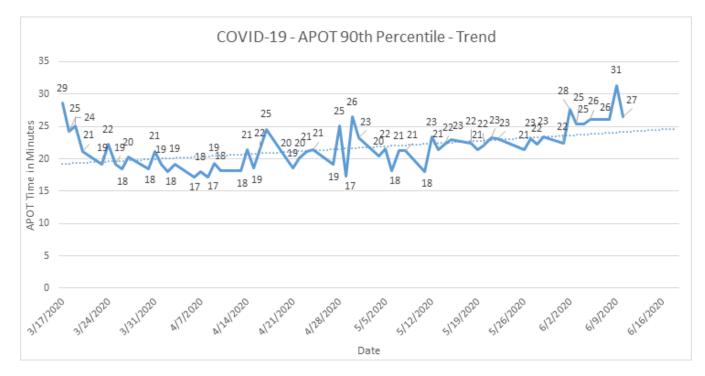

• CDPH SNF Dataset is a point-in-time snapshot of the skilled nursing facilities (SNFs) in California that have reported one or more confirmed COVID-19 cases, by either a resident or health care worker (HCW), within the previous 24 hrs

Emergency Medical Services Status

- 9-1-1 ambulance transport volume has increased. Over the last week it is about 15% below normal average
- Non-emergency ambulance transports have increased but still remain well below normal at about 40% below average.
- Notable Emergency Department Diversion (ED closed to all ambulance transport due to no ED capacity) noted in past few days & Thursday, 3 hospitals reported 3-16 hours of ED diversion reported
- Ambulance Patient Offload Time (APOT) is defined as the time the ambulance arrives at the receiving destination (wheels stop) to the time that the ambulance crew physically transfers the patient to the ED gurney. Last 24 hours: Current Average APOT is <u>13m38s</u> / Current 90th Percentile APOT is <u>26m54s</u>.
- Countywide APOT (90th) times have increased over the last few days. The chart below displays a daily trend since COVID-19 began.

HOSPITAL STATUS

Hospitals (26): Anaheim Regional, Anaheim Global, Chapman Global, CHOC, CHOC at Mission, Foothill, Fountain Valley, Garden Grove, Hoag-Irvine, Hoag-Newport Beach, Huntington Beach, Kaiser-Anaheim, Kaiser-Irvine, La Palma, Los Alamitos, Mission –Laguna Beach, Mission-Mission Viejo, Orange Coast Memorial, Orange County Global, Placentia Linda, Saddleback Memorial, Saint Jude, South Coast Global, St. Josephs, UCI, West Anaheim

- Hospital occupancy increasing; surgeries/elected procedures up; no unmet PPE needs (except gowns)
- As of 6/8/20 1200, hospitals reported 22 out of county COVID + hospitalized patients.
- Since 5/31/20, Orange County Hospitals have accepted 21 COVID+ interfacility

Imperial County Interfacility Decompression – El Centro Regional Medical Center COVID+ Transfers to OC Hospitals 5/31/20 – 6/7/20					
Receiving Facility	4/1/20 - 5/31/20	6/1/20 - 6/7/20	TOTAL ACCEPTED		
Hoag Hospital Newport Beach	9	0	9		
La Palma Intercommunity Hospital	0	3	3		
Mission Hospital Mission Viejo	1	0	1		
UC Irvine Medical Center	6	2	8		
TOTAL ACCEPTED	16	5	21

6/10/20

Reporting Date: 6/9/20	Acute Care Hospital PPE – DAYS ON HAND				
(32/33 ACHs reported)	0 - 3 days	4 - 14 days	15+ days	Non Reported	
N95 Masks	1	8	17	6	
Surgical Masks	1	7	18	6	
Face Shields	3	6	17	6	
PAPR Hoods	7	6	8	11	
Eye Protection	2	5	19	6	
Gowns	2	10	14	6	
Gloves	5	9	12	6	

- On a routine basis, the MHOAC tracks daily hospitalizations, census, occupancy and PPE availability as well as reviews epidemiologic data (doubling time).
- The criteria in the table below serve as objective measures to identify the need for hospitals to shift to crisis care strategies (i.e. activate surge plans) & uses the following assumptions:
 - o Increased pressure in hospitals & on the EMS system requires a shift to crisis care strategies
 - Low levels of PPE will come earlier than decreased capacity and cause an abrupt change in capacity.
 - Increased hospitalizations and low PPE could have a synergistic effect to reduce capacity.
 - Low levels of PPE is not just a marker of capacity but causes capacity issues.

Hospital Criteria for shifting to Crisis Care Strategies					
	STATUS				
CRITERIA	Normal Operations	Modified Operations Under Control	Modified Operations Assistance Needed		
Rate of change in Hospitalized COVID-19	Never to 4 weeks	4 weeks to 2 weeks to	Less than 2 weeks to		
patients (doubling time over last 7 days)	to double	double	double		
Absolute COVID-19 Census in the hospital	Less than 500	500-750	>750		
Hospital census as a percentage of capacity	<80%	80% to 90%	>90%		
Supply of PPE available in the hospitals	>4 weeks	2 to 4 weeks	< 2 weeks		

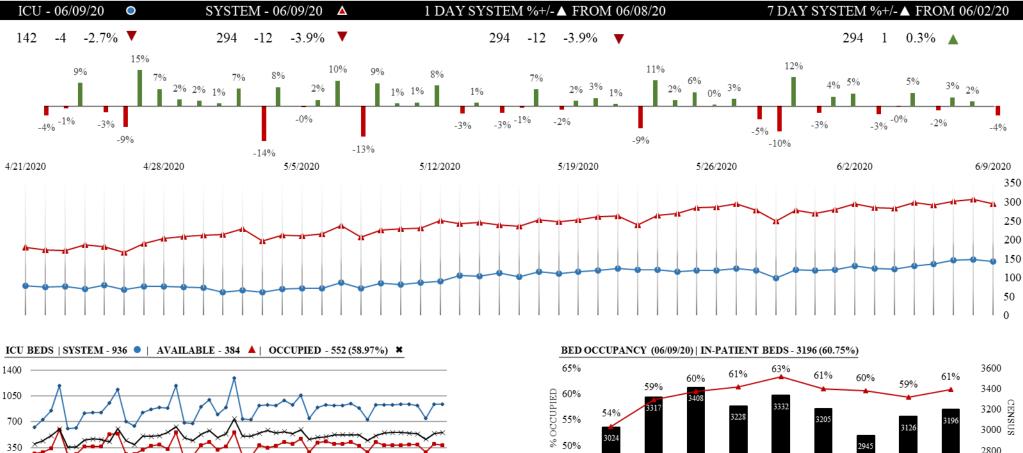

- Taking all of the data into consideration, current status of Hospital's surge ability is EXCELLENT
 - Doubling Time 35.1 days
 - 7-day hospitalization rate increased 0.3%
 - Absolute COVID-19 Census in hospital: 294
 - Hospital census as a percentage of capacity: 61%
 - PPE Supply 2-4 weeks
 - Over 1,400 COVID Surge Beds OPEN
 - Over 600 Ventilators AVAILABLE
