*Data posted is always preliminary & subject to change. More information may become available as individual case investigations are completed. LOCAL DATA MAY BE DIFFERENT FROM THE STATE WEBSITE DATA

- Testing is now available through an appointment-based drive-thru site that can serve more than 1,000 people daily; Wed-Sun 0800-1600 at Anaheim Convention Center, West Street entrance
- Available to Orange County residents at no-cost for people who meet Public Health priorities for testing and cannot get a test through their medical provider (doctor). Please contact your provider first
- Public Health criteria for priority testing:
  - Healthcare workers and first responders
  - Workers in congregate living settings such as skilled nursing facilities, jails, or homeless shelter settings
  - Individuals with close contact (15 minutes or more within 6 feet) to someone known or suspected to have COVID-19
  - Essential workers – those with contact with the public such as such as grocery store workers, social service providers, government workers, etc.

EMERGENCY MEDICAL SERVICES STATUS

- 9-1-1 ambulance transport volume was lower yesterday, but has been stable overall for the last few days. They continue to average about 10% below normal average.

- Non-emergency ambulance transports were lower last weekend when compared to the previous weekend. They were about 35% below normal.

- Primary Impressions of Cold/Flu/ILI by 9-1-1 EMS providers continue to trend lower over the last few days from a peak reached a couple weeks ago.
Ambulance Patient Offload Time (APOT) is defined as the time the ambulance arrives at the receiving destination (wheels stop) to the time that the ambulance crew physically transfers the patient to the ED gurney. Last 24 hours: **Current Average APOT is: 11m26s / Current 90th Percentile APOT is: 19m54s**

The chart below displays a daily trend since the COVID-19 event began.

- Seven (7) ERCs had APOT times greater than thirty (30) minutes.
- One (1) ERC had APOT times greater than sixty (60) minutes.

*Note: a handful of ERCs were close to the 30 minute threshold, but were not over it.*

---

**Emergency Department (ED) Diversion & Computerized Tomography (CT) (ED closed to all ambulance transport due to no ED capacity or no CT available) for the last 30 days 6/27/20 – 7/26/20 below.**
As of 7/27/20, OC Hospitals have accepted 33 COVID+ interfacility transfers from Imperial County

As of 7/27/20, hospitals reported there were 24 out-of-county patients, no patients from Imperial County are currently hospitalized.

CONFIRMED - Mechanical Ventilators in use for COVID Confirmed Patients - The number of patients hospitalized in an inpatient bed who have laboratory-confirmed COVID and are on a mechanical ventilator at the time the data is collected.

SUSPECTED - Mechanical Ventilators in use for Suspected COVID Patients - The number of suspected COVID patients hospitalized in an inpatient bed who are on a mechanical ventilator at the time the data is collected.

CVD+TTL - Mechanical Ventilators in use for Hospitalized COVID Patients - The number of patients hospitalized in an inpatient bed who have suspected or confirmed COVID and are on a mechanical ventilator at the time the data is collected. Added to SmartSheet April 21, 2020.

SYSTEM OCC - The number of mechanical ventilators, including anesthesia machines and portable/transport ventilators, in use for patients with any diagnosis in the hospital - including Neonatal (NICU), Pediatric (PICU), and adult ICU units. As of April 21, 2020 NICU/PICU patients were added to ventilator reporting.
Agencies significantly changed reporting requirements for hospitals effective 07/22/20.
New data is not available to OCEMS from the Snowflake Server for any dates after 07/21/20 at this time.

- On a routine basis, the MHOAC tracks daily hospitalizations, census, occupancy and PPE availability as well as reviews epidemiologic data (doubling time).
- The criteria in the table below serve as objective measures to identify the need for hospitals to shift to crisis care strategies (i.e. activate surge plans) & uses the following assumptions:
  - Increased pressure in hospitals & on the EMS system requires a shift to crisis care strategies
  - Low levels of PPE will come earlier than decreased capacity and cause an abrupt change in capacity.
  - Increased hospitalizations and low PPE could have a synergistic effect to reduce capacity.
  - Low levels of PPE is not just a marker of capacity but causes capacity issues.

## Hospital Criteria for shifting to Crisis Care Strategies

<table>
<thead>
<tr>
<th>CRITERIA</th>
<th>Normal Operations</th>
<th>Modified Operations Under Control</th>
<th>Modified Operations Assistance Needed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rate of change in Hospitalized COVID-19 patients (doubling time over last 7 days)</td>
<td>Never to 4 weeks to double</td>

<td>&gt;750</td>
</tr>
<tr>
<td>Hospital census as a percentage of capacity</td>
<td>&lt;80%</td>
<td>80% to 90%</td>
<td>&gt;90%</td>
</tr>
<tr>
<td>Supply of PPE available in the hospitals</td>
<td>&gt;4 weeks</td>
<td>2 to 4 weeks</td>
<td>&lt; 2 weeks</td>
</tr>
</tbody>
</table>
It is important to note that the basis of the table is that these are concepts and criteria that we use to judge how the system is being affected by the COVID-19 pandemic. The numbers and colors given are a guideline, not a hard and fast rule. For example, if in 2 weeks our hospitalized cases go up by a factor of 1.8 to a level of 740, we will still consider that to be very concerning and would not wait until the doubling time worsens or the census tops 750.

Hospital Surge Plans are already activated to an extent, as conditions worsen (higher COVID-19 inpatient burden, Staffing struggles, PPE concerns)

Does this trigger a shift to crisis care strategies and an activation of surge plans? That number is one factor. Surge plans are already activated to an extent. Increased concerns (more factors in the worrisome category) means increased amount of surge as in the next question.

What are the surge plans and crisis care strategies that would be implemented?
-Modifying units, such as converting beds/rooms to ICUs and negative pressure rooms
-Expanded beds also includes surge tents
-Flexing nursing staffing ratios

How was the 750-patient threshold determined?
Initial surge capacity of the hospitals was around 1000 beds. We figured that if we were getting close to that number, we need to take extra steps beyond the initial ones. Again, the exact number is not as important as the concept of stress on the system.

All hospitals are impacted. We initially saw the highest degree of hospital burden in the hot spots of the county (Anaheim and Santa Ana), but as COVID-19 has become more widespread we are seeing the burden shift to hospitals based on their size, not just location.

### AGENCY OPERATIONS CENTER / LOGISTICS SECTION
- AOC Activated at Level II; Hours of Operation Mon & Thurs 0900-1600; Warehouse Ops M-F 0900-1600
- As of 07/20/20 - AOC Warehouse received a large shipment of over 160 pallets from CDPH
- SCARCE Resources: Gloves, Wipes
