-Inclusion criteria for diseases vary based on disease.

-Case counts less than five are suppressed to protect patient confidentiality. A double asterisk (or **) indicates a suppressed value.

-Cases are grouped using episode date, which is the earliest available of: onset, laboratory specimen collection, diagnosis, death, and report received dates.

-Incidence rates are suppressed when case counts are less than 5. A double asterisk (or **) indicates a suppressed value.

-Incidence rates are per 100,000 OC residents.

-RSV deaths <5 years, invasive *H. influenzae* <5 years, and invasive pneumococcal <18 years use age-specific denominators.
