### **Description of Project**

On April 25, 2023, Orange County Environmental Health, Solid Waste Program – Local Enforcement Agency (LEA) received an application package from OCWR (owner/operator) for a new Solid Waste Facility Permit (SWFP) for the Valencia Greenery composting operations located at the Olinda Alpha Landfill. The proposed Valencia Greenery would divert and compost the green waste already coming into the landfill along with additional food waste, agricultural material, and manure. A maximum of 228 tons of material is proposed to be composted per day. The LEA finds the application package to be consistent with the facility’s California Environmental Quality Act document and state minimum standards; therefore, accepted the package as complete and correct for a new SWFP on May 25, 2023.

### **Purpose of the Meeting**

This informational meeting is to inform the public about the proposed new SWFP for this facility and to provide comments to the LEA regarding the proposed action. After the informational meeting, the proposed permit along with the application package and comments from this meeting will be submitted to the California Department of Resources Recycling and Recovery (CalRecycle) for an additional public meeting and their concurrence. Information about CalRecycle’s public meetings can be found on their website: <https://www.calrecycle.ca.gov/PublicMeeting/>.
