

County of Orange
Emergency Medical Services
Orange County Medical Emergency Data System (OC-MEDS)
Kaiser Permanente Orange County – Bi-Directional Data Exchange Project
Using the Barcode Scanner in Elite Field to Link Patient Records
Training for EMS Field Personnel

Introduction:

The OC-MEDS system has been integrated with Kaiser Permanente’s medical records system at both Orange County facilities (**Kaiser Anaheim Medical Center** and **Kaiser Irvine Medical Center**) which allows your PCR to be ingested into the receiving hospital’s system and enables outcome data pertaining to your incident to be transmitted back to your agency. To link the patient records, a **Medical Records Number (MRN)** and an **Encounter Number** (known as the Contact Serial Number, or “CSN”) needs to be added to your PCR to help establish a matching record in the hospital’s system. This information can **only** be gathered by **scanning a QR code** on the patient’s **facesheet** once your patient has been registered in the emergency department.

Procedure:

The whole process can be viewed in a training video at:

<https://youtu.be/ap5XUdx0kal>

Locate the **QR code on the upper right corner** of your patient’s facesheet. The QR code includes both the patients MRN and CSN.

Ethnicity:	Puerto Rican		

To use the barcode scanner in Elite Field to add the MRN and CSN to your PCR

1. On the “Destination” panel; Select “**Kaiser Permanente – Anaheim Medical Center**” or “**Kaiser Permanente – Irvine Medical Center**” in the “Destination/Transferred To, Name” field.
2. The “Kaiser Data Exchange” panel will display.
3. Tap on the “Scan Destination Facility Barcode” button.
4. Tap “Allow” to access your device’s camera.
5. Position your camera over the **QR code on the upper right corner** of the facesheet. The system will add the MRN and CSN to your PCR.

• **NOTE: This process is sensitive to low light situations. Make sure you’re in a well-lit area.**
