## **Reportable Communicable Conditions**

## **Communicable Disease Control**

P.O. Box 6128, Santa Ana, CA 92706-0128

Phone: (714) 834-8180 / Fax: (714) 564-4050 / E-mail: epi@ochca.com For urgent reports after hours or holidays, please call (714) 834-8180.

- ② Anaplasmosis
- Anthrax, human or animal
- Babesiosis
- Botulism (infant, foodborne, wound, other)
- Trucellosis, human
- ② Brucellosis, animal (except B. canis)
- Campylobacteriosis
- ② Candida auris, colonization or infection
- Carbapenem-resistant Enterobacteriaceae (lab only) \*\*\*
- Carbapenemase-producing organisms (lab only) \*\*\*
- ⑦ Chancroid
- Chikungunya virus infection
- Chlamydia trachomatis infection, including

lymphogranuloma venereum (lab only)

- Cholera
- Ciguatera fish poisoning
- ⑦ Coccidioidomycosis
- Coronavirus Disease 2019 (COVID-19)
- ② Creutzfeldt-Jakob disease and other transmissible spongiform encephalopathies
- Cryptosporidiosis
- ⑦ Cyclosporiasis
- ② Cysticercosis or taeniasis
- Dengue virus infection
- Tiphtheria
- Tomoic acid poisoning (amnesic shellfish poisoning)
- **7** Ehrlichiosis
- Encephalitis (specify viral, bacterial, fungal, parasitic)
- Escherichia coli: shiga toxin producing (STEC) including E. coli O157
- Extended spectrum beta-lactamase producing organisms (lab only) \*\*\*
- Tlavivirus infection of undetermined species
- Toodborne disease, two or more from separate

households and suspected same source

- **⑦** Giardiasis
- ⑦ Gonococcal infections
- Haemophilus influenzae, invasive disease all serotypes (persons under 5 years of age)
- Hantavirus infections
- Themolytic uremic syndrome
- Hepatitis A, acute infection
- ② Hepatitis B (specify acute case, chronic, or perinatal)
- ② Hepatitis C (specify acute case, chronic, or perinatal)
- ⑦ Hepatitis D (Delta) (specify acute case or chronic)
- ② Hepatitis E, acute infection
- ② Human Immunodeficiency Virus (HIV), acute infection
- ② Human Immunodeficiency Virus (HIV) infection, any stage or progression to stage 3 (AIDS)
- ⑦ Influenza deaths (persons under 65 years of age) \*\*\*
- Tinfluenza due to novel strains (human)
- ② Legionellosis
- ② Leprosy (Hansen's disease)
- ② Leptospirosis
- Listeriosis
- ① Lyme disease
- Malaria
- Measles (Rubeola)
- Meningitis (specify viral, bacterial, fungal, parasitic)

## Mandated reporting timeframes:

- Immediately by phone
- Within one working day of identification
- ⑦ Within seven calendar days of identification
- Report Quarterly
- \*\*\* Locally reportable
- Meningococcal infections
- Ⅲ Methicillin-Resistant *Staphylococcus Aureus* (Inpatient cases, lab only) \*\*\*
- Middle East Respiratory Syndrome
- Mpox or orthopox virus infection
- ⑦ Mumps
- To Occurrence of any unusual disease
- Toutbreaks of any disease, including those not on this list
- Novel virus infection with pandemic potential
- Taralytic shellfish poisoning
- Paratyphoid Fever
- Pertussis
- Plague, human or animal
- Pneumococcal disease, invasive, 0-18 years old
- Poliovirus infection
- Psittacosis
- Q Fever
- Rabies, human or animal
- Relapsing fever
- ② Respiratory syncytial virus-associated deaths in laboratory-confirmed cases less than 5 years of age
- ② Rickettsial diseases (non-Rocky Mountain spotted fever), including typhus and typhus-like Illnesses
- ⑦ Rocky Mountain spotted fever
- ② Rubella
- 7 Rubella syndrome, congenital
- Salmonellosis (other than typhoid fever)
- Scombroid fish poisoning
- Shiga toxin (detected in feces)
- Shigellosis
- Smallpox (variola)
- Syphilis (all stages, including congenital)
- ⑦ Tetanus
- Trichinosis
- Tuberculosis (including suspect cases)
- Tularemia, human
- 7 Tularemia, animal
- Typhoid fever, cases and carriers
- Tunusual diseases
- Varicella (outbreaks, hospitalizations and deaths)
- Vibrio infections
- Tiral hemorrhagic fevers, human or animal (e.g., Crimean-Congo, Ebola, Lassa, and Marburg viruses)
- West Nile virus infection
- Yellow fever
- Yersiniosis
- Zika virus infection
  - \*To report non-communicable diseases/conditions (e.g. disorders characterized by lapses of consciousness, pesticide-related illness or injury, cancer) see the "Reporting Diseases/Reporting Other Than Communicable Diseases".

Last Updated: 12/2023

\*\*Do not fax HIV reports. HIV is reportable by traceable mail or person-toperson transfer. For more HIV-specific requirements, please visit <a href="Public Health Services/HIV Surveillance">Public Health Services/HIV Surveillance</a>.
