

Systems Advisory Meeting (SAM) Proposed Framework for Committee Review and Input

This sample agenda is provided for discussion purposes as part of the proposed one-year pilot to combine the TAC, FAC, and CPAC meetings. It is intended to illustrate a potential meeting structure and workflow and does not represent a final agenda or meeting format.

Agenda topics, sequencing, time allocations, committee sections, meeting times, and other elements are preliminary and subject to change based on committee member and stakeholder feedback, operational needs, and experience during the pilot period.

The goal of circulating this draft is to invite input from committee members and partners so that the final structure preserves the important functions and perspectives of TAC, FAC, and CPAC while reducing duplication, improving coordination, and making the best use of participants' time.

Thank you.
